Footnotes:

(1) Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.

(2) Annual wages have been calculated by multiplying the hourly mean wage by 2,080 hours; where an hourly mean wage is not published, the annual wage has been directly calculated from the reported survey data.

(3) The relative standard error (RSE) is a measure of the reliability of a survey statistic. The smaller the relative standard error, the more precise the estimate.

(4) Hourly wage rates for occupations where workers typically work fewer than 2,080 hours per year are not available.

(5) This wage is equal to or greater than \$70.00 per hour or \$145,600 per year.

(8) Estimate not released.
